

# SenseMaker™ Minimum System Requirements

The Cognitive Edge® SenseMaker™ suite of products are 100% pure Java stand-alone applications that run on Windows, Linux, or Mac OS X computers. There are no pre-requisites other than a supported operating system.

The software can be downloaded from Cognitive Edge's web site once license documentation has been exchanged. After running the installation executables, SenseMaker™ is easily set up and managed.

## Cognitive Edge® SenseMaker™ Collector

Collector can run as a web service on a server or as a network service across a network behind a firewall.
